PROFESSIONAL SUMMARY

Motivated B.Tech Computer Science Engineering student specializing in **Artificial Intelligence and Machine Learning** with hands-on experience in developing **Retrieval-Augmented Generation (RAG) systems, semantic search applications, and AI-powered document intelligence solutions. Passionate about Generative AI, Machine Learning, NLP, and Cloud Technologies**, with a strong interest in building scalable AI products and contributing to innovative global technology teams.

TECHNICAL SKILLS

Programming languages	Python, SQL, HTML,CSS
Artificial Intelligence & Machine	RAG, NLP, Semantic search, Prompt Engineering, Vector Databases, Document Intelligence Systems, LLM Application Development
Frameworks & Libraries	Fast API, Streamlit, Sentence Transformers, FAISS, PyPDF, Pydantic, Requests, Uvicorn
Generative AI & LLMs	Ollama, Llama 3.2, Retrieval Pipelines
Data & search technologies	FAISS Vector Database, Embedding Generation, Similarity Search, Knowledge Base Construction
Cloud & Tools	AWS Fundamentals, git, GitHub, Postman, VS Code
Document processing	OCR, Tesseract OCR, PDF Processing, PDF2image
Soft Skills	Problem Solving, Analytical Thinking, Communication Skills, Team Collaboration, Adaptability, Quick Learning, Research & Documentation, Time management

PROJECT

Enterprise RAG Assistant

Technologies: Fast API, FAISS, Sentence Transformers, Streamlit, Ollama, OCR, Python

Designed and developed a full-stack Retrieval-Augmented Generation (RAG) platform capable of processing PDF documents and answering natural language questions using semantic search and Large Language Models.

Key Contributions

- Developed an end-to-end AI document assistant using FastAPI and Streamlit.
- Implemented OCR-based extraction for scanned PDF documents.
- Built a semantic retrieval pipeline using Sentence Transformers and FAISS.
- Integrated Llama 3.2 through Ollama for local AI inference.
- Created a multi-document knowledge base with source-aware retrieval.
- Developed conversational memory for context-aware responses.
- Implemented document chunking, embedding generation, and vector indexing.
- Built REST APIs for document upload and intelligent question answering.
- Added source attribution and retrieval transparency for generated answers.
- Implemented Git-based version control and repository management using GitHub. Evaluated cloud deployment options and documented deployment constraints for resource-intensive local LLM workflows.

Features

- Multi-PDF Upload Support
- OCR Processing
- Semantic Search
- Conversational Memory
- Source Citation
- Streamlit User Interface
- FastAPI Backend
- Local LLM Integration

EDUCATION

B.Tech — Computer science & Engineering

2023 September -now

Sreenivasa Institute Of Science & Technology | JNTUA | CGPA: 7.84 / 10 (78.43%)

Expected Graduation – 2027

12th (PCM) —RK Model Junior College

Mar 2023

Mathematics, Physics, Chemistry | 66%

10th —RK Model EM High School

Mar 2021

CGPA: 10 / 10

ADDITIONAL INFORMATION

Date of Birth	19 September 2006	Father's Name	S. Raja Naidu
Relocation	Open to anywhere in India, WFH, Remote	Languages	Telugu, English, Hindi

I hereby declare that the above information is true and correct to the best of my knowledge.
